Guttur(Vill),Doddabelur(Post), Denkanikottai(Tk), Hosur, Krishnagiri(Dt), TamilNadu-635113.

Education

> Master Of Computer Applications

Bharathiar University, Coimbatore-641046

2021 - 2023

CGPA: 8.68/10

> Bachelor of Mathematics

Krishna Arts and Science College, Krishnagiri-635001

2018 - 2021

CGPA: 8.191/10

Skills

- **Python Programming**
- **Django Framework**
- **HTML/CSS**
- **SQL**
- **Web Development**
- **Data Analytics**
- **Machine Learning**
- **NLP**
- **Artificial Intelligence**
- **Data Science**
- **Internet Of Things (IoT)**
- **Embedded System**
- **Robotics Automation Basics**
- **PHP Programming Language**
- **Laravel Framework**

About Me

Motivated MCA graduate and Full-Stack Developer with 3+ years of experience and strong expertise in Python, Django, HTML/CSS, SQL, Laravel, and IoT-integrated web solutions. Proven in building scalable, user-centric applications through academic, personal, and professional projects from concept to deployment. Passionate about teaching and training—delivered hands-on programs in Python, full-stack web development, AI/ML, and IoT to 1500+ students. Quick learner and collaborative team player eager to contribute innovative, data-driven web and smart system solutions in dynamic environments.

Certified Courses

> DATA ANALYTICS WITH PYTHON

SWAYAM | ONLINE

Jan 2022 - Apr 2022

> FUNDAMENTALS OF PYTHON

GREAT LEARNING | ONLINE

Jul 2022 - Aug 2022

> DATA SCIENCE WITH R PROGRAMMING

SIMPLILEARN | ONLINE

Jul 2022 - Aug 2022

> FUNDAMENTALS OF IOT (INTERNET OF THINGS)

UDEMY | ONLINE

Nov 2022

Academic/Personal Projects

> SMART IRRIGATION SYSTEM

ACADEMIC PROJECT(MCA) | OCT 2022

Developed an IoT application aimed at regulating water flow according to soil moisture levels, allowing farmers to optimize their time effectively.

> USER ROLES PERMISSION MANAGEMENT SYSTEM

ACADEMIC PROJECT(MCA) | DEC 2022

Drive Link: https://drive.google.com/file/d/17wNBVA9B95uOk_IE5AxQRHM0qiq40uIa/view?usp=drive_link

Collaborated with a team to develop this Project. Designed and implemented a web page focusing on Admin, User-Controller, and specific user data. The system efficiently displays all roles in the staff panel, enhancing user role permission management.

> SMART HEALTH MONITORING SYSTEM

ACADEMIC PROJECT(MCA) | FEB 2023 – MAY 2023

Drive Link: https://drive.google.com/file/d/17wNBVA9B95uOk_lE5AxQRHM0qiq40uIa/view?usp=drive_link

Implemented a Smart Health Monitoring System using Raspberry Pi. Utilized sensors to detect human body temperature, heart rate, oxygen saturation (SpO2), and patient position in angle. Stored continuous patient records in a CSV file using an efficient storage method. Developed a User Interface with predefined rules for obtaining patient details, ensuring ease of use and accuracy in health parameter detection.

> SMART CAR HANDBRAKE ALERT SYSTEM

PERSONAL PROJECT | DEC 2023 – APR 2024

Developed an IOT Application that can alert the car driver when he forgot to put handbrake when parking a car. This Application includes Sensors, Actuators and a call alert system using the technology of IoT. And I designed a PCB Prototype of this project, to carry and place inside the car user-friendly.

> SMART HOME AUTOMATION

PERSONAL PROJECT | JUNE 2024

Developed an IOT Application that can control the home lights, fans through mobile webserver wirelessly, also I designed a PCB prototype for this project.

> SMART SURVEILLANCE CAMERA

PERSONAL PROJECT | APR 2024 – MAY 2024

Developed an Security Camera using ESP32 Cam Module to monitor the videos through wirelessly using webserver page using the technology of IOT.

> SMART EXTENSION BOX USING IOT

PERSONAL PROJECT | JAN 2025 – FEB 2026

Developed an IoT-based smart extension box for wireless remote control of connected electrical devices (lights, fans, appliances) via mobile or laptop. Utilized ESP8266 microcontroller with WiFi AP mode communication to enable reliable local wireless control without internet dependency. Implemented real-time switching and hardware-software integration for low-cost home automation.

> WEB HOSTING USING RASPBERRYPI ZERO W

PERSONAL PROJECT | DEC 2025 – FEB 2026

Deployed globally accessible Django web app on Raspberry Pi Zero W using Apache, Cloudflare Tunnel for secure HTTPS, GitHub cloning, and Hostinger domain—achieved low-cost, self-hosted production setup. This project highlights full-stack deployment skills (backend configuration, server management, secure tunneling), IoT/hardware-software integration, and cost-effective hosting—ideal for showcasing self-reliance in production-grade web solutions on constrained devices like Raspberry Pi.

> LOCAL JOB OFFER WEB APP (Student-Guided Django Project)

MENTORED PROJECT | JAN 2026

Guided student in developing a Django-based web platform for local job offerings, featuring user/job management and basic CRUD operations. Utilized Python, Django framework, HTML/CSS, SQLite database, and GitHub for version control and collaboration. Implemented core Django components (models, views, templates) in a clean project structure, demonstrating full-stack web development fundamentals.

Work/Training Experience

> INTERNET OF THINGS(IOT)

INTERNSHIP (ONLINE) | Mar 2023 - Jul 2023

Elewayte - Providers of Online Training, Bangalore.

I completed an Internet of Things(IoT) Internship with Certification which includes the learning of technologies in IoT like Protocols, Communications, Wiring etc,.

> IOT Developer

WORK (ON-SITE) | Apr 2023 - Oct 2023

Azonix Tech Private Ltd, Chennai.

I developed a firmware for Electric Vehicle Supply Equipment(EVSE) Project which is used both Electric Bike and Electric Car Using PlatformIO IDE in the Technology of IoT. Also I worked with Voltage Meter(3-Phase) Project in developing of firmware for the project.

> Certified Python Developer Course

TRAINING (ON-SITE) | March 2024

Vellalar College For Women & VET Institute of Arts and Science College, Erode.

Rathinam College of Arts and Science, Coimbatore.

Kangeyam Institute of Commerce, Tiruppur.

I conducted a 6-day training program as an Industrial Expert for students from various departments under the MSME Central Government Skill Development Program.

> Artificial Intelligence with Machine Learning Course

TRAINING (ON-SITE) | Feb 2024 & April 2024

Hindusthan College of Arts and Science, Coimbatore &

VET Institute of Arts and Science College, Erode.

This course was offered under the MSME Central Government Skill Development Program. I conducted a 10-day training session for AI & DS department students at both colleges.

> Robotics Automation Technical Trainer

WORK (ON-SITE) | July 2024 - Sep 2024

Jain Public CBSE School, Ballari, Karnataka - 583104.

This additional course for CBSE school students was offered by CipherSeraph Tech Pvt. Ltd and I worked as a Robotics Automation Trainer.

> Python Programming Course

TRAINING (ONLINE) | Sep 2024 - Dec 2024

IncepicX JM EduTech Services, Kelamangalam, Hosur, Tamilnadu – 635113.

I conducted this online training program for absolute beginners, focusing on building a strong foundation in Python programming. The course covered essential programming concepts, hands-on coding exercises, and project-based learning to enhance practical skills.

> Full-Stack Development Internship

TRAINING (ONLINE) | Jan 2025 - Mar 2025

IncepicX JM EduTech Services, Kelamangalam, Hosur, Tamilnadu – 635113.

I conducted an online internship program focused on full-stack web development. The training included front-end & back-end development, practical project implementation, and guidance on industry-relevant tools and best practices to prepare students for real-world web development.

> Internet Of Things (IoT) Internship

TRAINING (ONLINE) | Jan 2025 - Mar 2025

IncepicX JM EduTech Services, Kelamangalam, Hosur, Tamilnadu – 635113.

I conducted an online internship program focused on the fundamentals and practical applications of the Internet of Things (IoT). The training included working with microcontrollers like Arduino and ESP8266, integrating sensors and actuators, and developing real-time IoT projects to help students gain hands-on experience in building smart systems like Smart Irrigation & Smart Home.

> Computer Science Mentor (AI&DS Dept.)

TRAINING (ON-SITE) | July 2025 - Present

FacePrep Campus (via Sasurie College of Arts and Science), Tirppur, Tamilnadu – 638056.

- Serve as full-time mentor for AI & Data Science students, guiding hands-on learning in web development, hardware/IoT projects, and full-stack technologies (Django, Python, HTML/CSS/JavaScript, PlatformIO IDE, VS Code, GitHub integration, web hosting).
- Mentored students in completing 20+ real-world projects (many in final stages with independent completion capability), including: web applications (e.g., management systems, e-commerce portals, AI tutors), IoT/smart devices (e.g., home automation, attendance monitoring, hardware modules), and network/automation solutions.
- Provided guidance and support for students' participation in multiple hackathons (including Smart India Hackathon 2025 preparations), resulting in enhanced communication, presentation, and teamwork skills; coordinated motivation and team formation efforts.
- Coordinated and delivered Value Added Courses in Python and Power BI for 200+ students, focusing on practical coding, data visualization, and industry-relevant tools.
- Facilitated holistic student development through industrial visits, seminars, conferences, college competitions, team-building activities, resume building workshops, LinkedIn/social media optimization for technical profiles, and guidance on earning certifications via platforms like HP Life, MongoDB, SWAYAM, etc.
- Encouraged collaborative use of Chat AI tools for project ideation, debugging, and acceleration, fostering self-reliant problem-solving and modern development practices.
